

SUSTAINABILITY EFFORTS

Wrk Lab does everything in our power to reduce the amount of product, trash & waste in our landfills.

We recycle any recyclable materials which include:

- Cardboard
- Paper
- Metal
- Wood

**10,000+
LBS
MONTHLY**

This totals approx. 10,000+ lbs monthly of materials saved from landfills.

Wrk Lab gives charities & non-profit organizations the ability to claim furniture before it's broken down for recycling. Thus far, we've assisted over 25 groups (and counting!).

25+

Wrk Lab also donates pre-owned office furniture and products to various schools, charities & organizations, eliminating the need for landfills.

**4X
LESS**

By using "Smash Our Trash", a trash compacting process, it allows materials to be broken down to the smallest piece possible which:

- Accelerates landfill decomposition
- Reduces greenhouse gas emissions

Because of this, we're able to empty our dumpster 4x less often.
